

## China Standards and Certification Fact Sheet (March 2009)

### INDUSTRY NAME: CLEAN ENERGY

#### OVERVIEW

In general, standards development activity in the clean energy sector is new, with one dedicated Technical Committee, TC 20 including six sub-committees. Participants are mainly government experts and academics with little local industry involvement and no foreign industry participation as yet. China's *Eleventh Five-Year Plan*, and subsequent *Resource Conservation and Comprehensive Use Standards Development Plans (2005-7 and 2008-10)* address renewable or clean energy. At least 649 national standards and 272 industry standards are proposed for development or revision, many of which cover solar, photovoltaic, off-grid wind power generation, on-grid wind power generation, bio-energy, hydrogen energy, and geothermal.

#### TECHNICAL COMMITTEES<sup>1</sup>

#### CHINA COMPULSORY CERTIFICATION

The following clean energy generation products are required to obtain China Compulsory Certification (CCC) before being imported into and/or sold in the PRC:

<i>HS Code</i>	<i>Product Name</i>
N/A	

1. This includes only Technical Committees accredited by the Standards Administration of China to develop National Standards or GB (Guo Biao).
2. Working groups involved in developing industry standards may be under the aegis of a regulating authority.
